ASBESTOS ABATEMENT PROGRAM AGREEMENTS – DCS-006-01

Dear Mr. Ouimette:

During our meeting on July 26, 2001, we discussed the asbestos abatement program and projects at Rocky Flats. In attendance at the meeting were representatives of Kaiser-Hill Company, (K-H), the Department of Energy, Rocky Flats Field Office (DOE, RFFO), and the Colorado Department of Public Health and Environment, Air Pollution Control Division (APCD). We came to the following agreements:

1. K-H and its asbestos abatement subcontractors will comply with all requirements of APCD's Regulation No. 8 (Reg. 8) when doing abatement work (except permits will not be issued).
2. K-H and its asbestos abatement subcontractors will continue to provide notification to the APCD for our abatement work in accordance with the requirements.
3. APCD will, when the asbestos abatement notice is deemed complete and adequate, return an asbestos approval notice to K-H authorizing the work to proceed.
4. While we feel strongly that the Rocky Flats Environmental Technology Site (Site) is a "non-public access" site, the commitment to comply with the substantive requirements of Reg. 8 renders that issue moot and the APCD will not make any determination.
5. K-H and the APCD will pursue opportunities to reduce administrative burdens related to the notification process including grouping a number of notifications together.
6. APCD agreed to provide updated lists of certified asbestos abatement contractors and personnel to assist K-H in assuring qualified contractors and workers are employed.
7. K-H will limit the individuals authorized to contact the APCD regarding asbestos work to one individual per project as designated below:

<u>Project</u>	<u>Contact</u>	<u>Telephone Number</u>
B371	Mark Simpson	(303) 966-3734
B771	Mike Brooks	(303) 966-7910
B776/777/707	Ted Hopkins	(303) 966-7652
RISS Project	Steve Nesta	(303) 966-6386

ADMIN RECORD

Page 2 of 2

I will continue to have overall programmatic responsibility for K-H and may be reached at (303) 966-9877. Jonathan Dion is the point of contact for DOE, RFFO and may be reached at (303) 966-5904. Either of us may be contacted for general issue resolution or programmatic improvements. Although not specifically discussed, I understand that Curtis Burns is the APCD contact for all asbestos abatement work at the Site.

I really appreciate your time and effort to come out the Site for the meeting. It is always so much easier to discuss issues and come to a resolution when we are together and all are familiar with the physical setting. Based on our communication about the content of this letter and the inclusion of your edits, I am assuming our agreement. If I am incorrect, please let me know.

We look forward to working with you and your staff as we undertake the many asbestos abatement projects required for the safe and successful closure of this Site.

Sincerely,

David C. Shelton
Vice President
Environmental Systems & Stewardship
